College of ICT, UDSM & University of Oslo, Norway

Call for Papers

The College of Information and Communication Technologies (CoICT) of the University of Dar es Salaam (UDSM), Tanzania in collaboration with the Department of Informatics of the University of Oslo, Norway are jointly hosting the International Federation for Information Processing (IFIP) Working Group 9.4 conference in May 1-3 2019 at Ramada Resort Hotel, Dar es Salaam, Tanzania. The designated IFIP working group 9.4 seeks to provide a platform where researchers and practitioners from developing and industrialized countries can share and exchange experiences on the social implications of computers in developing countries.

With the proliferation of Information Communication Technology (ICT) related projects to support development, the southern countries are now emerging as important innovators and actors in the global adoption of ICT for the community development. Strengthening a southern-driven cooperation promotes ICT projects for, in and by developing countries. Thus, the upcoming conference theme of **"Strengthening Southern-driven cooperation as a catalyst for ICT4D"** seeks to stimulate and encourage critical discussions on different facets of Southern-driven cooperation, its promises and potential for creating a better world, and the challenges faced in achieving the promised potential.
